

KAZATOMPROM
NATIONAL ATOMIC COMPANY

Investor Handout

1H2026

Disclaimer

IMPORTANT: You must read the following before continuing. The following applies to this document, the oral presentation of the information in this document by Joint stock company "National atomic company "Kazatomprom" (the "**Company**") or any person on behalf of the Company, and any question-and-answer session that follows the oral presentation (collectively, the "**Information**"). In accessing the Information, you agree to be bound by the following terms and conditions.

The Information does not constitute or form part of, and should not be construed as an offer or the solicitation of an offer to subscribe for or purchase any securities in the Company or any other entity, nor shall it or any part of it nor the fact of its distribution form the basis of, or be relied on in connection with, any contract or investment decision in relation thereto, and no part of the Information shall form the basis of or be relied on in connection with any contract or commitment whatsoever, nor does it constitute a recommendation regarding any such securities. The Information is not directed to, or intended for distribution to or use by, any person or entity that is a citizen or resident of, or located in, any locality, state, country or other jurisdiction where such distribution or use would be contrary to law or regulation or which would require any registration or licensing within such jurisdiction.

The Information is preliminary and indicative in nature, and does not purport to contain all information necessary to evaluate the Company, its financial position and/or any investment decision. The Information is not intended to provide, and should not be relied upon for, accounting, legal or tax advice nor does it constitute a recommendation to purchase any securities in the Company or any other entity. Accordingly, by attending any presentation or meeting in which the Information is made available or by receiving this document through any other means, you represent that you are able to receive the Information without contravention of any legal or regulatory restrictions applicable to you and will not use the Information in relation to any investment decisions.

No reliance may be placed for any purposes whatsoever on the Information or on its completeness. The Information is subject to updating, revision, further verification and amendment. The Company is not under any obligation to update or keep current the Information. No representation or warranty, whether express or implied, is given by or on behalf of the Company or any of the entities accounted for in the Company's financial statements as joint ventures, joint operations, associates or financial investments ("**JVs and Associates**"), any of their respective affiliates, agents or advisers or any of the foregoing persons' affiliates, directors, officers or employees or any other person as to the fairness, accuracy, completeness or verification of the Information or the opinions contained therein, and no liability is accepted for any such information or opinions by any party. While the Information is believed to be accurate, the Company, its shareholders, and its advisors as well as the directors and officers of such parties disclaim any and all responsibility and liability whatsoever, whether arising in tort, contract or otherwise, for the contents of, errors in or omissions from, the Information for any loss, cost or damage suffered or incurred howsoever arising, directly or indirectly, from any use of the Information or otherwise in connection with the Information. No representations or warranties are made as to the accuracy or completeness of any statements, estimates and projections with regard to the future performance of the Company or any of the JVs and Associates. Nothing in the Information is intended to be, nor may be construed as, a profit forecast. Interested parties should conduct their own investigation and analysis of the Company and of the data contained in the Information.

Certain Information, including but not limited to market data, has been obtained or derived from published or non-published sources prepared by other parties, which in certain cases have not been updated to the date hereof. While such information is believed to be reliable for the purposes of the Information, no responsibility is assumed for the accuracy or completeness of such information, and such information has not been independently verified by the Company. Market data used in the Information not attributed to a specific source are estimates of the Company which have not been independently verified. Except where otherwise indicated herein, the Information is based on matters as they exist as of the date hereof and not as of any future date, and will not be updated or otherwise revised to reflect information that subsequently becomes available, or circumstances existing or changes occurring after the date hereof. The Information, including but not limited to forward-looking statements, applies only as of the date hereof and is not intended to give any assurances as to future results. The Company expressly disclaims any obligation or undertaking to disseminate any updates or revisions to the Information, including any financial data or forward-looking statements, and will not publicly release any revisions it may make to the Information that may result from any change in the Company's expectations, any change in events, conditions or circumstances on which these forward-looking statements are based, or other events or circumstances arising after the date hereof.

All statements other than statements of historical fact included in the Information are forward-looking statements. Forward-looking statements give the Company's current expectations and projections relating to its financial condition, results of operations, plans, objectives, future performance and business. These statements may include, without limitation, any statements preceded by, followed by or including words such as "target," "believe," "expect," "aim," "intend," "may," "anticipate," "estimate," "plan," "project," "will," "can have," "likely," "should," "would," "could" and other words and terms of similar meaning or the negative thereof. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors beyond the Company's control that could cause the Company's actual results, performance or achievements to be materially different from the expected results, performance or achievements expressed or implied by such forward-looking statements. Such forward-looking statements are based on numerous assumptions regarding the Company's present and future business strategies and the environment in which it will operate in the future.

THE INFORMATION WITH RESPECT TO ANY PROJECTIONS PRESENTED HEREIN IS BASED ON A NUMBER OF ASSUMPTIONS ABOUT FUTURE EVENTS AND IS SUBJECT TO SIGNIFICANT ECONOMIC AND COMPETITIVE UNCERTAINTY AND OTHER CONTINGENCIES, NONE OF WHICH CAN BE PREDICTED WITH ANY CERTAINTY AND SOME OF WHICH ARE BEYOND THE CONTROL OF THE COMPANY. THERE CAN BE NO ASSURANCES THAT THE PROJECTIONS WILL BE REALIZED, AND ACTUAL RESULTS MAY BE HIGHER OR LOWER THAN THOSE INDICATED. NONE OF THE COMPANY NOR ITS SHAREHOLDERS, DIRECTORS, OFFICERS, EMPLOYEES, ADVISORS OR AFFILIATES, OR ANY REPRESENTATIVES OR AFFILIATES OF THE FOREGOING, ASSUMES RESPONSIBILITY FOR THE ACCURACY OF THE PROJECTIONS PRESENTED HEREIN.

About Kazakhstan

PREDICTABLE & SAFE REGION

- One of the first countries to voluntarily give up **nuclear weapons**
- The first country in Central Asia to have been a member of the **UN Security Council**
- Co-pressed over IAEA's **International Conference on Nuclear Security 2024**
- Hosted **World Nuclear Fuel Cycle 2024**

ECONOMICALLY STABLE COUNTRY

- **49th largest economy by GDP** according to World Bank 2024 ranking (from 101st in 2000)
- **Gross foreign investments**
~431 billion USD over the past 30 years
- **Credit ratings**
 - Moody's – Baa1 stable (2026)
 - S&P – BBB/A-2 stable (2026)
 - Fitch – BBB stable (2026)

PRO-BUSINESS ENVIRONMENT

- **29th** according to World Bank's 2025 **“B-READY”** ranking
- Regulatory Framework – 69.51 (2nd quintile)
- Public Services – 71.61 (1st quintile)
- Operational Efficiency – 66.40 (2nd quintile)

FAST DEVELOPING ECONOMY

- **9th largest country** by territory
- **20.6 mln** population (2026, IMF)
- **15,530 USD GDP per capita** (2025, IMF)
- **4.6% GDP growth** (2026 projection, IMF)
- **16.75%** key policy rate (NBRK)
- **10.2%** inflation (July 2026, NBRK)
- **486.34** average **USD:KZT** FX rate (1H2026)

ABUNDANT NATURAL RESOURCES

- **~5,000** deposits
- **99** out of **118** periodic table elements
- **#1** zinc, tungsten, barite reserves
- **#2 uranium**, chromite, argentum, lead reserves
- **#6** gold reserves
- **#7** coal reserves
- **#12** oil reserves
- **#24** gas reserves

Investment Thesis

Largest producer, one of the lowest average operating costs in the industry

Resilient financials and commitment to sustainable returns present an asymmetric investment opportunity for value-oriented investors

Largest ISR uranium reserves, priority access to Kazakhstan's resources

Solid health, safety and environmental records, commitment to strong ESG

Positioned for growth, global customer portfolio

Committed to high international standards of governance

#1 **U₃O₈** **PRODUCTION SALES**

~63% EBITDA margin

Highest dividend payer in the industry

2025 – 2034 Strategy

Efficient Use and Replenishment of Resources – Key Strategic Priority

Mission

Support the global transition to clean energy, paving the way for a sustainable future

Vision

To be an international leader in the nuclear industry

SAFE

AS CLEAN AS
RENEWABLES

ADVANCING
TECHNOLOGY

2025 – 2034 STRATEGIC GOALS

Enhance focus on uranium mining as our core business, with efforts concentrated on replenishment and efficient use of resource base

Expand our footprint in the nuclear fuel cycle, given the arising opportunities, substantiated by economic value

Develop and expand rare and rare-earth metals segment under the critical minerals agenda

Continue to diversify sales and further enhance trading function

Improve and strengthen leading business and ESG practices in order to ensure and uphold integrity of business

COMPANY OPERATIONS

Uranium Mining in Kazakhstan

Mining Assets Production Breakdown

Mining Asset	Partner	KAP Interest (%)	Accounting Treatment	Depletion (year) ¹	1H2026 tU as U ₃ O ₈ , (100% basis)	% of 1H2026 production (100% basis)

Source: Company information.

¹ Based on LoM plans as per CPR

² The Company holds 50% (direct ownership) in Energy Asia (BVI) Limited. Energy Asia (BVI) Limited holds 40% (direct ownership) in Kyzylkum LLP and 95% (direct ownership) in Baiken-U LLP

³ KAP directly owns 5% of Baiken-U and indirectly owns 47.5% of shares through Energy Asia, thus in total having 52.5% shares of Baiken-U

⁴ JV Budenovskoye LLP entered the consolidation perimeter starting 1 January 2024

⁵ On 17 April 2026, the subsoil use rights for the Akdala deposit were transferred from Kazatomprom to Kazatomprom-SaUran LLP. Prior to transfer to Kazatomprom-SaUran LLP Kazatomprom owned the contract and is entitled to the production for the period (23 tU)

13,291⁵

100

Resilient Mineral Resource Base

Sustainable Reserve Replacement Rate

Evolution of KAP's Ore Reserves

➤ **Reserve Replacement Dynamics:**

in 2019–2025, successful R&R growth offset 106% of uranium extraction volumes, demonstrating the ability to grow the reserve base despite active mining

➤ **High-Quality Inventory:**

the stability of the reserve base around ~500 ktU throughout the 7-year period highlights the world-class scale and sustainable nature of the Company's Tier-1 assets

Figures for 2018–2025 are based on the SRK audited annual Mineral Resource and Ore Reserve statements in accordance with the JORC Code.
All figures are reported on a 100% basis.
Depletion is calculated based on annual production volumes adjusted by an assumed recovery factor of 0.9 to reflect total in-situ mineral extraction from the resource base. Actual recovery factors are deposit-specific and typically range between 80% and 90%, as per the 2024 CPR report.
Additions and Reductions reflect the net impact of exploration success, resource-to-reserve conversion, and technical/economic re-evaluations (including changes in cut-off grades and geological modeling).

Organic Growth Upside

Best positioned to capitalise on the fundamental growth, continuing to focus on long-term value creation

Sustainable Production Potential

All figures are on a 100% basis

- Existing production profile is based on Subsoil Use Agreement (SUA) levels, representing 100% nominal volumes, subject to actual production decisions within 20% flexibility range
- Brownfield upside: assumes exploration efforts at currently producing mines and Inkai-3 entering into production
- Greenfield upside: assumes successful exploration at existing blocks, where the Company already holds an exploration licenses
- The Company aims to secure a robust resource base to meet demand amid upcoming deficit

Production outlook based on the Company's CPR 2024 and long-term strategic modeling. It constitutes company estimates and does not represent official operational guidance. Figures are on a 100% basis and do not reflect attributable ownership. Profiles beyond current SUAs (Brownfield/Greenfield) are conceptual and subject to regulatory approvals, licensing, and successful exploration. Actual outcomes are subject to significant risks, including but not limited to geological uncertainties, uranium market price volatility, inflationary pressures, and changes in the regulatory environment.

Kazatomprom's Exploration Upside Potential

CAPEX for
exploration projects
through 2030

Pathway to Expansion

* Total Mineral Inventory represents the Company's aggregate inventory on a 100% basis. This figure comprises total JORC-compliant Mineral Resources, plus the exploration potential of four key Exploration Properties ([East-Zhalpak](#), [Budenovskoye 5](#), [Severnoye](#), and [Inkai-Mynkuduk](#)) which are currently at evaluation stage. Figures cited are as per preliminary estimates, not accounted for in CPR. N.B. The "exploration potential" included in the Total Mineral Inventory represents Exploration Targets as defined by the JORC Code. These targets are conceptual in nature based on preliminary data; there has been insufficient exploration to define them as Mineral Resources, and it is uncertain if further exploration will result in their conversion to Mineral Resources or Ore Reserves. The progression of these assets along the "Pathway to Expansion" is subject to successful exploration results, definitive feasibility studies, and securing of necessary subsoil use rights. Final production outcomes will be subject to prevailing market conditions, including long-term U₃O₈ pricing, inflationary pressures on AISC, and the stable supply of key reagents, specifically sulphuric acid.

MARKET OVERVIEW

Long-term Supply & Demand Dynamics

Imminent structural deficit to grow going forward

- Widening supply and demand gap
- Long mine development timelines
- Rising prices incentivise new production
- Idle capacity restarts announced
- New potential production is not sufficient to cover demand post-2030

Source: UxC, Uranium Market Outlook 2026-Q1
Used by KAP with permission

Historic Demand – a Long-term Market

Entering a new contracting cycle

Strong Market Fundamentals

- The market is showing clear signals of a fundamental shift:
 - pricing power has returned to producers with proven and large uranium reserves; while
 - utilities procurement strategies are moving away from short-term spot reliance toward long-term inventory security
- Contracting activity is still below replacement rates: with reactor requirements at ~170 Mlbs in 2025, only 77% were covered

Source: UxC
Used by KAP with permission

Committed to Market Discipline

Creating long-term value through **value-over-volume strategy**

Kazakhstan Production Volume

100% basis, per Subsoil Use Agreements (SUAs)

Source: OFR reports, CPR 2024 report. Production guidance for 2026 illustrated as the middle of the 2026 guidance range. Adjustment refers to changes introduced to the Subsoil Use Agreements, effectively illustrating the difference between the nominal 100% SUA level in the previous CPR report and CPR 2024 report

Significant supply impact

- 2017-2025 (actual): Reduced over **48 ktU / 126 Mlbs** total
- 2026: adjusted SUA levels by **3 ktU / 8 Mlbs**
- 2026 production (expected): 27.5 – 29.0 ktU (71.49 – 75.39 Mlbs)

Ongoing challenges and risks:

- Limited access to sulphuric acid
- Industry-wide production cost inflation

Pricing Methodology Provided by TPL¹

Month-end spot price dynamics 2021-2025

- Under short-term contracts price is fixed on the offer date
- Given time allotted by Kazakhstani Transfer price legislation, delivery date (at which the sales revenue is recorded) could take up to ten months from the offer date

¹ Transfer Pricing Law of the Republic of Kazakhstan, Pricing methodology for Uranium concentrates

Uranium Sales Price Sensitivity (1/2)

One of the industry's highest average realized price exposures to spot price

Uranium Sales Price Sensitivity (2/2)

One of the **industry's highest average realized price exposures to spot price**

Avg. Annual Spot Price (USD)	2026E	2027E	2028E	2029E	2030E
40	55	40	40	40	40
60	65	57	58	58	58
80	74	72	75	75	76
100	80	85	90	91	93
120	86	97	105	106	109
140	93	109	119	122	125
160	99	121	134	137	141

Values are rounded to the nearest dollar. The sensitivity analysis above is based on the following key assumptions:

- Annual inflation is assumed to be 2% in the US for the purposes of this analysis.
- The analysis was conducted as of 30 June 2026 and covers the 2026-2030 period based on the Group's sales commitments. The sales volume under the contracts, as of 30 June 2026, will be fulfilled in accordance with existing contractual terms (i.e., contracts featuring hybrid pricing mechanisms with a fixed-price component, calculated per an agreed price formula, and/or a combination of individual spot, mid-term, and long-term prices). Kazatomprom's marketing strategy is not targeted at a specific share of fixed-price versus market-linked contracts within its portfolio, allowing the Company to remain flexible and respond effectively to market signals.
- A difference between sales prices and spot prices is expected for 2026, since deliveries under some long-term contracts in 2026 incorporate a proportion of fixed pricing that was negotiated during a lower price environment.
- The final average sales price is influenced not only by the annual average level of spot prices but also by the timing of deliveries. Consequently, when selling significant volumes of uranium linked to spot prices at the moment of delivery the resulting sales price may deviate either upward or downward from the values presented in the sensitivity table, due to spot price volatility during the year.
- As new contracts are signed, the final average sales price may differ from the values specified in the sensitivity table.

Transportation Routes

Offering **resilient and reliable** logistical channels based on client preferences

Some of Kazatomprom's products are exported through the northern transport route via the port of St. Petersburg

The uranium transportation itself is challenging, because class 7 cargo is under strict regulations. Despite the fact, KAP always manages to fulfill all of its commitments

Currently there are no restrictions or issues to use the northern transport route

TRANS-CASPIAN INTERNATIONAL TRANSPORT ROUTE (TITR) successfully utilised since 2018

TITR has enough capacity to potentially accommodate greater quantities for both Kazatomprom and its JV partners

TITR has higher complexity due to its multimodality, but the Company is ready to go an extra mile to deliver

Kazatomprom constantly works on diversifying and improving its transportation capabilities

— ESTABLISHED ROUTES
--- ROUTES UNDER DEVELOPMENT

Global Presence, Strong Customer Base

Diversification of sales portfolio remains the Company's strategic focus

Uranium exclusion from US trade tariffs also highlights the strategic importance of security of uranium supply to American utilities, which Kazatomprom has always supported

Consolidated sales of U_3O_8 by region

(% of consolidated U_3O_8 sales volume)

OPERATING & FINANCIAL HIGHLIGHTS

Operating Highlights

Proven production & sales record backed by best-in-class assets

Financial Highlights

Resilient **business model**, strong **financial performance**

* Adjusted EBITDA is calculated by excluding from EBITDA items not related to the main business and having a one-time effect. Calculation: Profit before tax - finance income + finance expense +/- Net FX loss / (gain) + Depreciation and amortization + Impairment losses - reversal of impairment +/- one-off or unusual transactions.

** Attributable EBITDA is calculated as: Adjusted EBITDA less the share of the results in the net profit in JVs and associates, plus the share of Adjusted EBITDA of JVs and associates engaged in the uranium segment, less non-controlling share of adjusted EBITDA of Appak LLP, JV Inkai LLP, Baiken-U LLP, MC Ortalyk LLP, Turanium LLP and JV Budenovskoye LLP less any changes in the unrealized gain in the Group.

*** Total capital expenditures (100% basis): includes only capital expenditures of the mining entities, includes significant CAPEX for investment and expansion projects. Excludes liquidation funds and closure costs.

Mineral Extraction Tax changes (1/2)

MET rate is linked to spot price and production volumes

- **2023–2024:** Uranium price considered for MET purposes is the average of spot prices quoted by the uranium price reporters (UxC and TradeTech) multiplied by the actual amount of uranium mined and a MET rate of **6%**.
- **2025:** For the year 2025, applicable MET rate for uranium was set to **9%**.
- **2026 and beyond:** Starting 1 January 2026, a differentiated MET approach depending on the actual volume of annual production under each SUA and the Uranium price has been introduced.

Annual production volume	Rate, %
Up to and including 500 tU	4%
Up to and including 1,000 tU	6%
Up to and including 2,000 tU	9%
Up to and including 3,000 tU	12%
Up to and including 4,000 tU	15%
Above 4,000 tU	18%

Furthermore, if U_3O_8 price exceeds the values specified in the table below, an additional MET rate increase will be applicable:

Weighted average U_3O_8 price (UxC/TradeTech)	Additional rate, %
Above \$70/lb	0.5%
Above \$80/lb	1.0%
Above \$90/lb	1.5%
Above \$100/lb	2.0%
Above \$110/lb	2.5%

Mineral Extraction Tax changes (2/2)

- MET is paid by Kazatomprom's mining entities, rather than at the group level. But MET is not calculated on a mining entity basis, but on a Subsoil Use Agreement (SUA) basis. Some mining entities hold multiple SUAs.
- MET is neither a progressive nor a marginal tax approach.
- Uranium price considered for MET purposes is the average of spot prices quoted by the uranium price reporters (UxC and TradeTech), not the average realized price.
- Uranium produced by Kazatomprom's JVs and associates is purchased from them by Kazatomprom at spot less applicable discount. In 1H2026, U_3O_8 was purchased at a weighted average discount of 3.41% to the prevailing spot price (3.65% in 1H2025).
- This setup creates a financial incentive for Kazatomprom to keep its group average realized price as close to U_3O_8 spot price as possible.
- MET increases will be offset to some extent due to a decrease in taxable base for corporate income tax calculation purposes.
- **A sensitivity analysis of the MET rate for different scenarios of uranium production and uranium prices for the year 2026 has been developed for investors' use:**

Average annual spot price (\$/lb)	Production volumes Guidance 2026 boundaries		
	27,500 tU	28,250 tU	29,000 tU
60	11.2%	11.6%	11.8%
70	11.7%	12.1%	12.3%
80	12.2%	12.6%	12.8%
90	12.7%	13.1%	13.3%
100	13.2%	13.6%	13.8%
110	13.7%	14.1%	14.3%

Key Cost Metrics Drivers

Mineral Extraction Tax affects C1, sulphuric acid cost affects C1 and CAPEX

¹ Total dividends paid in the calendar year. Dividend yield shown relative to the close price on the last trading day before the ex-date. Net Income (prior period) is Profit for the year attributable to owners of the company for the preceding year, for Dividends in any calendar year are calculated based on the financial results of the prior period

² Source: Bloomberg, Citi's Depositary Receipt Services. As stated in the IPO Prospectus, the Depositary shall make reasonable efforts to establish the GDR Record Date as closely as practicable to the applicable record date for the Deposited Property (if any) set by the Company in Kazakhstan.

³ As of 21 August 2026

* Dividends for FY2021, paid out in July 2022, include a one-time effect resulting from the sale of a 49% stake in Ortalyk LLP

2026 Guidance

Consistent focus on value strategy

Key performance indicators		Updated 2026 guidance USD:KZT 490	Previous 2026 guidance USD:KZT 540
Production volume U ₃ O ₈ (100% basis) ^{1,2}	tU	27,500 – 29,000	27,500 – 29,000
	MIbs	71.49 – 75.39	71.49 – 75.39
Production volume U ₃ O ₈ (attributable basis) ^{2,3}	tU	14,500 – 15,500	14,500 – 15,500
	MIbs	37.70 – 40.30	37.70 – 40.30
Group sales volume (consolidated) ⁴	tU	19,500 – 20,500	19,500 – 20,500
	MIbs	50.70 – 53.30	50.70 – 53.30
KAP sales volume (incl. in Group) ⁵	tU	13,100 – 14,100	13,100 – 14,100
	MIbs	34.06 – 36.66	34.06 – 36.66
Revenue – consolidated ⁶	KZT bln	2,100 – 2,200	2,200 – 2,300
Revenue from Group U ₃ O ₈ sales ⁶	KZT bln	1,900 – 2,000	2,075 – 2,175
C1 cash cost (attributable basis)	\$US/lb	25.50 – 27.00	23.50 – 25.00
All-in sustaining cash cost (attributable C1 + capital)	\$US/lb	39.00 – 40.50	35.00 – 36.50
Total CAPEX of mining entities (100% basis) ⁷	KZT bln	435 – 450	415 – 430

¹ Production volume U₃O₈ (tU) (100% basis): amounts represent the entirety of production of an entity in which the Company has an interest; it disregards that some portion of production may be attributable to the Group's JV partners or other third-party shareholders. Precise actual production volumes remain subject to converter adjustments and adjustments for in-process material.

² Production volume U₃O₈ (tU) (attributable basis): amounts represent the portion of production of an entity in which the Company has an interest, corresponding only to the size of such interest; it excludes the portion attributable to the JV partners or other third-party shareholders. For JV Inkai LLP, annual share of production on attributable basis is determined by the Implementation Agreement, concluded between participants of the entity. For JV Budenovskoye LLP, 100% of the 2025-2026 annual production is fully committed under an offtake contract at market-related terms.

³ Group sales volume: includes Kazatomprom's sales and those of its consolidated subsidiaries (according to the definition of the Group provided on page one of this document). Group U₃O₈ sales volumes do not include other forms of uranium products (including, but not limited to, the sales of fuel pellets and enriched uranium).

⁴ KAP sales volume (included in Group sales volume): includes only the total external sales of KAP HQ and THK. Intercompany transactions between KAP HQ and THK are not included.

⁵ Revenue expectations are based on uranium prices taken at a single point in time from third-party sources. The prices used do not reflect any internal estimate from Kazatomprom, and 2026 revenue could be materially impacted by how actual uranium prices and exchange rates vary from the third-party estimates.

⁶ Total capital expenditures (100% basis): includes only capital expenditures of the mining entities and significant CAPEX for investment and expansion projects. Excludes liquidation funds and closure costs. For 2026 includes development costs for mining infrastructure of JV Budenovskoye LLP, Ortalyk LLP (Zhalpak), and Kazatomprom-Sauran LLP (Inkai-3) for a total amount of approximately KZT 119 billion (previous Guidance for 2026 – KZT 121 billion).

* Note that the conversion of kgU to pounds U₃O₈ is 2.5998.

** For some JVs, the Company has a right to purchase additional volumes beyond its attributable share if the JV partner chooses to forgo its entitled share of production (beyond the production volume attributable to Company).

ENVIRONMENTAL, SOCIAL & GOVERNANCE

Kazatomprom ESG Landscape (1/2)

KAP GDRs are held by ESG funds compliant with EU **SFDR articles 8 and 9**.

KAP has been a **UN Global Compact** Participant since 2022

S&P Global

S&P Global has assigned KAP a Corporate Sustainability Assessment **score of 50/100**, exceeding industry average.

KAP received a **"B-"** (management) score for Climate change, and **"C"** for Water Security.

KAP received a Sustainalytics ESR risk score of **31.6**. The level of ESG management was assessed as **"high"**.

LSEG ESG score of **3.0 out of 5** demonstrates a high ranking of KAP amongst uranium companies (**#2 out of 16**).

2030 ESG Targets

-10%

reduction of GHGs (Scope 1+2) compared to the level of 2021

-15%

reduction of water consumption (uranium mining) compared to the level of 2022

APPENDIX

Overview of ISR uranium mining

Natural uranium production by ISR vs conventional mining

- ✓ Lower cost to build
- ✓ Shorter construction timelines
- ✓ Lowest quartile operating cost
- ✓ Small environmental footprint
- ✓ Limited health and safety exposure to personnel

Share of ISR mining in total uranium production (2025)

Source: WNA

ISR mining sequence at a deposit

- Deposit development using the ISR method is carried out through a system of technological wells (without disturbing the earth's surface).
- The wells are combined into one technological block. Each technological block is processed individually through the ground infrastructure system. Each technological block is isolated and prepared for production in different periods relative to adjacent blocks.
- ISR method uses sulphuric acid for two distinct stages - block preparation (acidification) and uranium mining:
 - Acidification – from 20% to 35% of the total volume of sulphuric acid. The volume of sulphuric acid for acidification depends on the required number of blocks prepared for extraction.
 - Uranium mining – from 65% to 80% of the total volume. Sulphuric acid is added to the solution during uranium mining to maintain the chemical and physical state, to enable transfer of uranium into solution.
- To provide a stable rate of uranium production, the ISR wellfield units should be placed in production in a systematic order. While some units are being leached, others are being prepared for production. When one unit is undergoing passive oxidation, another is in the terminal leach phase, while yet another one is in reclamation. More acid is needed at the stages of block preparation and closure.

At peak production rate, ~20%-40% of the block's ore reserves have been extracted

Wellfield block production profile*

- A typical block contains ~25-50 wells in three rows 30-60 meters apart: two injection rows straddling one production row
- Total block production varies – some 30-50 tU, others 400-500 tU, depending on various technical factors

*representative model – specific block and orebody profiles will vary from this statistical model

Sulphuric Acid – Key ISR Component

- ~60% of the world's sulphuric acid is utilised in the production of fertilisers
- Short-term deficit both domestically and regionally due to:
 - growing demand from agricultural sector
 - supply chain, geopolitical uncertainty

RUSSIA

KAP's in-house production capacity:

- ◆ SKZ-U ~500,000 tpa
- ◆ SSAP ~180,000 tpa
- ◆ TQZ* – expected launch in Q3'2027-Q1'2028

* Nameplate capacity ~800,000 tpa

Kazakhstan Export Blend Crude Oil (KEBCO) has a Sulphur content of 1.36%, oil & gas industry is a stable source of sulphur

– source of sulphuric acid imports

Refining and conversion technology transfer from Cameco

FOCUS:

Primary Uranium Production

Turkestan, Kyzylorda and Akmolinskaya obl.

● Kazatomprom is present ● Projects in development ● Other NFC stages

➤ Focusing on uranium mining as our core business

➤ Optimise production & sales volumes based on market conditions

Ulba Metallurgical Plant (UMP)

Ulba-FA LLP

Kazakhstan-Chinese JV between
UMP (51%) and CGNPC-URC (49%)

One of the world's largest facilities for fuel pellet and rare metals

Beryllium

One of four facilities in the world with a full refining cycle

~**20–25%** global market share

Tantalum and Niobium

One of leading producers worldwide with a full refining cycle
and the only one in the CIS region

~**7–9%** global tantalum market share

Framatome AFA 3G™

The most popular fuel assembly design in pressurized water reactors (PWRs) worldwide, including Belgium, China, France, Germany, South Africa, Spain, Sweden and US.

Ulba-FA LLP has obtained **Framatome** certificates confirming that the plant is authorised and capable of manufacturing **AFA 3G™** type AA and type A assemblies with a capacity of 200 tonnes of uranium per year¹.

A single FA consists of 264 fuel rods, which are long metal rods loaded with uranium fuel pellets, which are manufactured by the Ulba Metallurgical Plant.

All requirements of CGNPC-URC, the guaranteed purchaser of the fuel assemblies, have been met, and the plant has obtained the status of being a certified supplier for the Chinese nuclear industry.

WORLD'S LARGEST URANIUM PRODUCER
